

Battersea Power Station wins prestigious award

KUALA LUMPUR: Battersea Power Station in London won the prestigious World Gold award under the Master Plan category at FIABCI World Prix d'Excellence Awards 2021.

The World Gold win is the highest-ranked position for the internationally coveted awards, SP Setia said in a statement, describing it is a great achievement by affirming Battersea Power Station's position as a world-class mixed-use development.

"The FIABCI World Prix d'Excellence Awards is one of the most prestigious inter-

national awards honouring projects that best embody excellence in the real estate industry.

"With a selection and judging panel comprised of internationally renowned real estate professionals and experts, FIABCI World Prix d'Excellence rewards projects not just for aesthetics, functionality or size, but based on their overall merits," SP Setia said.

The chairman of Battersea Project Holding Company, Datuk Ahmad Pardas Senin

described it as a "proud win for Battersea Power Station and for us, the Malaysian shareholders of this iconic project."

"We recognise the importance of creating values and are committed to contributing to building a harmonious and caring community," he said.

Chairman of Battersea Power Station Development Company, Datuk Wong Tuck Wai said the Battersea Power Station project has provided an extraordinary opportunity to revitalise a once derelict abandoned

building into a progressive urban and sustainable development.

"Achieving this award from FIABCI World Prix D'Excellence right after the recent momentous handing over of the Power Station to its first residents makes us exceptionally proud of our endeavours," Wong said.

Located in London, Battersea Power Station is a 42-acre mixed-use development and one of the most eagerly anticipated regeneration projects in Europe.
